

Assignment -4

Objective

Creating a React application using the React Router in which we make a four-page Home, About, User Info, and Not Found Page.

Problem Description:

Home and About Page:

- Create both pages with your mind, but the UI is attractive
- You can choose any website's home and about page, but not copy code, and not create with AI.

User Info Page:

- Display details of any person, such as their image, name, age, date of birth, and more.

Not Found Page:

- Show not found page if user accesses the page rather than home, about, and user info

Header :

- Create a header part with logo and Navlink

The website should be Responsive according to all screen sizes

Submission Guidelines

1. Deploy the React code on Netlify and Vercel.
2. If you don't know how to deploy React code on a free hosting platform, watch this YouTube video <https://youtu.be/AP0fKMrmyKA?si=wKbklcCA3rGCFDbZ>
3. **Deploy Link:** Submit Deploy Link in Readme.md file of task-related GitHub repo.

4. **Submission Link:** Submit the GitHub repo Link in the Submission Box.
